**IT Il centro ricerche Catalano ha sviluppato internamente nuovi smalti colorati capaci di garantire nel tempo un'assoluta resistenza alle abrasioni, agli acidi e agli sbalzi termici. Applicate ad una selezione di prodotti già presenti a catalogo, le nuove colorazioni comprendono morbide tinte pastello e toni neutri satinati, che riescono a "vestire" con carattere ed eleganza le ceramiche Catalano conferendogli un inedito ruolo arredativo.**

**EN Catalano Research Centre has developed in-house new colored glazes able to guarantee a high resistance over time to abrasions, acids and thermal shock. Applied to a selection of products, the new colors deliver soft pastel shades. These neutral satin tones are able to "dress up" with elegance the Catalano ceramics, giving them greater peculiarity and a new decorative role.**

**DE FARBEN  
WEICHE FARBTÖNE FÜR DAS  
BADEZIMMER**

Das Forschungszentrum Catalano hat intern neue farbige Emailen entwickelt, die im Laufe der Zeit absolute Beständigkeit gegen Abrieb, Säuren und Temperaturschwankungen garantieren. Die neuen Farben, die auf eine Auswahl bereits im Katalog enthaltener Produkte angewandt werden, umfassen weiche Pastelltöne und neutrale Satintöne, die in der Lage sind, die katalanische Keramik mit Charakter und Eleganz zu "kleiden" und ihr eine neue Einrichtungsrolle zu verleihen.

**FR COLORIS  
DE DOUCES NUANCES POUR LA  
SALLE DE BAINS**

Le centre de recherches Catalano a développé en interne de nouveaux émaux colorés en mesure de garantir, dans le temps, une résistance absolue aux abrasions, aux acides et aux écarts thermiques. Appliqués à une sélection de produits déjà présents sur le catalogue, les nouveaux coloris comprennent des teintes pastel délicates et des tons neutres satinés, qui réussissent à « habiller » avec caractère et élégances les céramiques Catalano, en leur offrant un rôle d'ameublement inédit.

**ES COLORES  
TONOS SUAVES PARA EL BAÑO**

El centro de investigación de Catalano ha desarrollado internamente nuevos esmaltes de colores que garantizan una resistencia absoluta a la abrasión, a los ácidos y a los cambios térmicos a lo largo del tiempo. Los nuevos colores, que se han aplicado a una selección de productos ya presentes en el catálogo, incluyen los suaves tonos pastel y tonos neutros satinados que logran «vestir» con carácter y elegancia las cerámicas de Catalano aportándoles un papel decorativo inédito.

**RU COLORI  
МЯГКИЕ ОТТЕНКИ ДЛЯ ВАННОЙ  
КОМНАТЫ**

Исследовательский центр компании Catalano разработал собственные новые цветные эмали, гарантирующие великолепную устойчивость к истиранию со временем, устойчивостью к воздействию кислот и перепадам температуры. Применительно к ассортименту продуктов, уже представленных в каталоге, новые цвета включают мягкие пастельные оттенки и нейтральные атласные тона, которые «облачают» керамические изделия Catalano с характером и элегантностью, наделяя их уникальной ролью предметов интерьера.

**IT Catalano ha messo a punto un esclusivo processo produttivo che consente l'applicazione di una "pelle" in oro 18k o in argento puro sui sanitari. Ne derivano finiture eccellenti, frutto di uno specifico processo di vetrificazione che consente di ottenere un grado di resistenza alle abrasioni "unscratchable", ai detergenti e agli sbalzi termici nettamente superiore rispetto agli smalti tradizionali. La brillantezza dei metalli preziosi, abbinata al bianco e al nero, definisce una soluzione estetica elegante e sofisticata.**

**EN Catalano experimentation on precious finishes has lead to the development of an exclusive production process for applying a "skin" of 18k gold and pure silver on sanitary-ware items. These precious finishes are the result of a special vitrification process which allows to get a much higher resistance to abrasions, detergents and to thermal shock than standard glazes. The brightness of metals combined with white and black colours create an elegant and sophisticated aesthetic solution.**

**DE GOLD&SILBER  
TECHNIK UND KOSTBARKEIT IM  
DIENSTE DER ELEGANZ**

Catalano hat ein exklusives Produktionsverfahren entwickelt, das die Aufbringung einer "Haut" aus 18-karätigem Gold oder reinem Silber auf Sanitärkeramik ermöglicht. Das Ergebnis ist ein hervorragendes Finish, das Ergebnis eines speziellen Verglasungsverfahrens, das es ermöglicht, einen Grad an Beständigkeit gegen "unkratzbare" Abschürfungen, Reinigungsmittel und Temperaturwechsel zu erreichen, der viel höher ist als bei herkömmlichen Emails. Die Brillanz der Edelmetalle, kombiniert mit Schwarz und Weiß, definiert eine elegante und anspruchsvolle ästhetische Lösung.

**FR OR ET ARGENT  
TECHNIQUE ET PRÉCIOSITÉ AU  
SERVICE DE L'ÉLÉGANCE**

Catalano a mis au point un processus exclusif de production qui permet l'application d'une «peau» en or 18k ou en argent pur sur les sanitaires. On en obtient des finitions parfaites, fruit d'une procédure spécifique de vitrification qui permet d'avoir un niveau de résistance aux abrasions «unscratchable», aux détergents et aux écarts thermiques nettement supérieure par rapport aux émaux traditionnels. La brillance des métaux précieux, associée au noir et au blanc, définit une solution esthétique élégante et raffinée.

**ES GOLD&SILVER  
TÉCNICA Y CALIDAD AL SERVICIO DE  
LA ELEGANCIA**

El catalán ha desarrollado un proceso productivo exclusivo que permite aplicar una «piel» de oro de 18k o plata pura encima de los sanitarios. El resultado es un acabado excelente fruto de un proceso específico de vitrificación que permite obtener un nivel de resistencia a la abrasión unscratchable, a los detergentes y a los cambios térmicos claramente superior respecto a los esmaltes tradicionales. El brillo de los metales preciosos, combinado con el blanco y el negro, define una solución estética elegante y sofisticada.

**RU GOLD&SILVER  
ТЕХНОЛОГИЧНОСТЬ И ИЗЫСКАННОСТЬ  
НА СЛУЖБЕ ЭЛЕГАНТНОСТИ**

Catalano разработала эксклюзивный производственный процесс, который позволяет наносить «кожу» из 18-каратного золота или чистого серебра на сантехнические изделия. Таким образом создается великолепная отделка, результат специального процесса витрификации, которая позволяет получить уровень устойчивости к истиранию "unscratchable", а также более высокий уровень устойчивости к воздействию моющих средств и перепадам температуры по сравнению с традиционной эмалью. Сверкание ценных металлов, в сочетании с белым и черным цветом, характеризует элегантное и изысканное с точки зрения эстетики решение.
